

**Nearly \$30,000 for a new well!
And we still don't have water!
Can You Help?**

This is the mess left after drilling a 350' hole in the ground. They drilled thru lots of wet clay which was thrown over a large area, including trees. The arrow is pointing to the well. All that shows is a 6" x 12" pipe. Cost for a 6" x 350' hole in the ground: \$27,298! We need a front loader to clean up the mess, if anyone has one to loan for a few hours.

340' of pvc
pipe, the pump,
wire & a couple
of other parts.
\$1,891.
